Summary

I have 1,5 years of non-commercial experience as a C and C++ developer. During this period I performed and successfully delivered training projects in UNIT Factory. These projects were solo and team. Also, I have 8 months of commercial experience as a full-stack developer(but mostly front-end) in a company which develops crypto-currency exchange platforms.

Like to solve puzzles, spend time on geek forums and always discover something new for myself. Take part in a variety of hackathons. On free time like to go to a cinema and play tennis.

Looking for a full-time job in an office near the metro station. I would like to take part in world-changing projects which will achieve my potential.

Work experience

Software Engineer

06/2018 - 01/2019

[HELIOS TECHNOLOGIES S.A.S.](#)

Performed a variety of tasks. Most time was involved in front-end development in Javascript. From time to time did manual QA of web pages. Besides that, I wrote automation tests using Cypress framework.
